JUAN MANJARRES

JUNIOR DEVELOPER
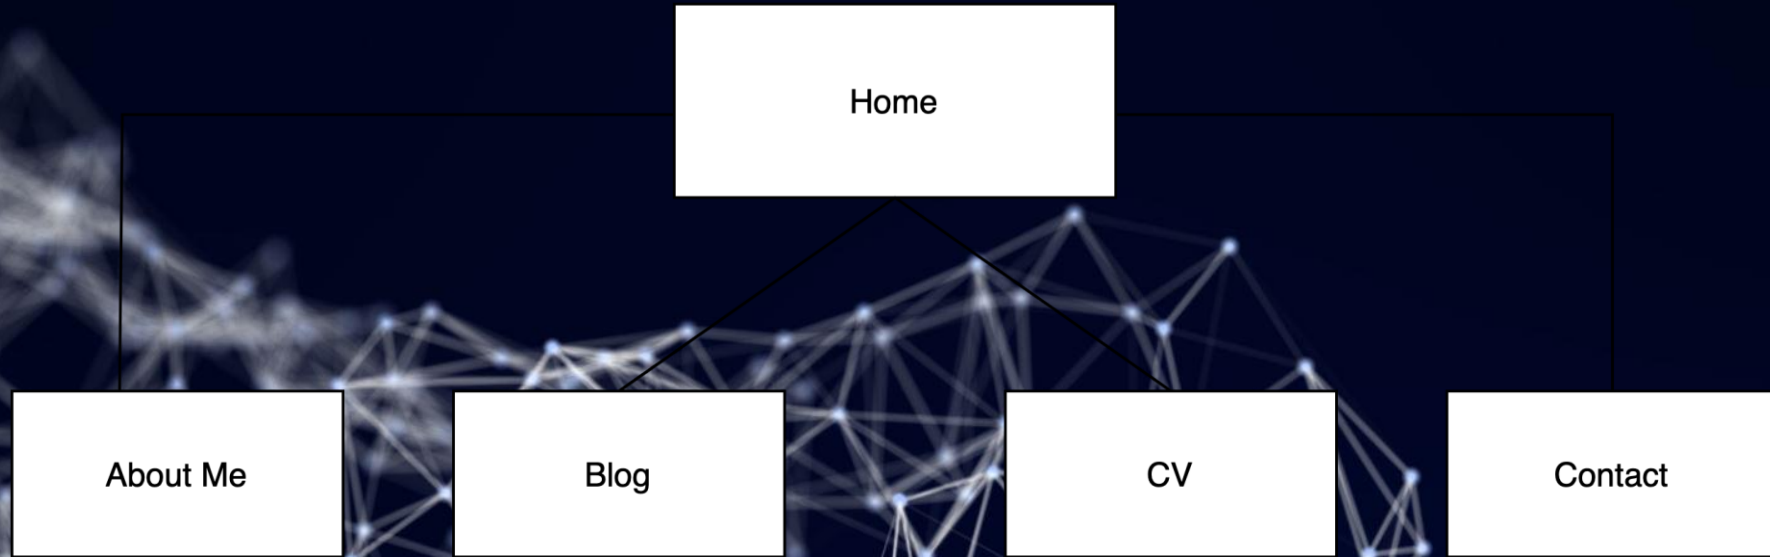

I am an aspiring front-end developer at Coder Academy, Who likes to code things from scratch, and enjoy bringing ideas to life in the browser.

And I would like to take you through my portfolio.

I have created this Portfolio as a platform to display professional knowledge, skill, and interest.

Site Map
The portfolio consists of 5 HTML pages supported by 6 CSS files and 1php file for my contact form. all of them are responsive to display it in different viewports sizes such as desktop and mobile phone.

Wireframes

I came with this mock-up of the pages.

All pages have a header with a logo that has an animation (360g rotation) on the left side and a menu on the right side, this lasts with a transformation into a hamburger icon once its size gets to a mobile size. A stylish/ classic soft pallet of a colours background photo, and a footer with social media icons that change colour on hover. These icons link to their respective social media profiles.
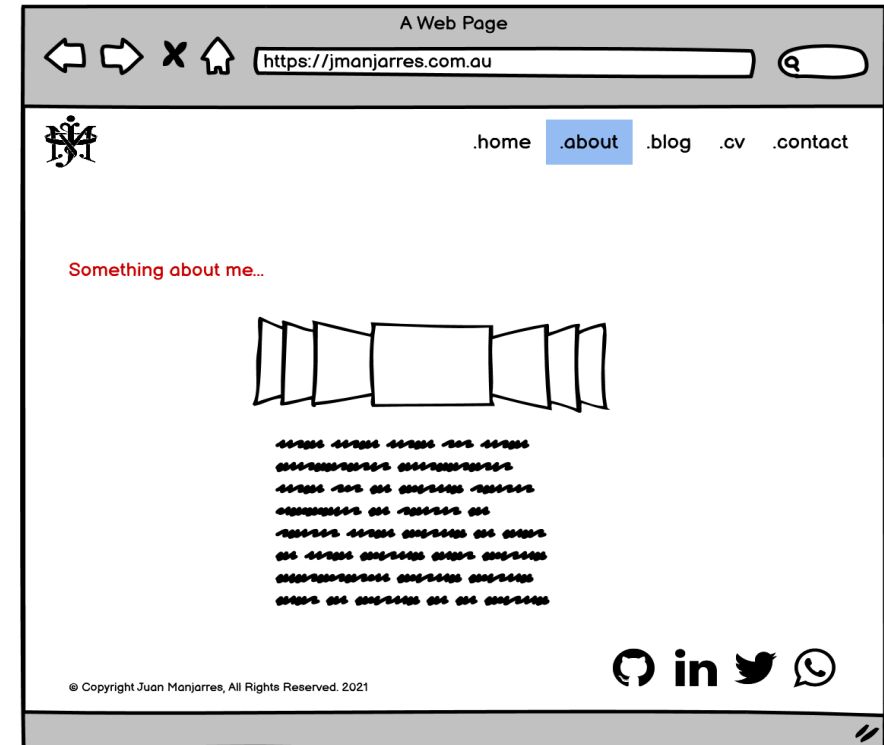

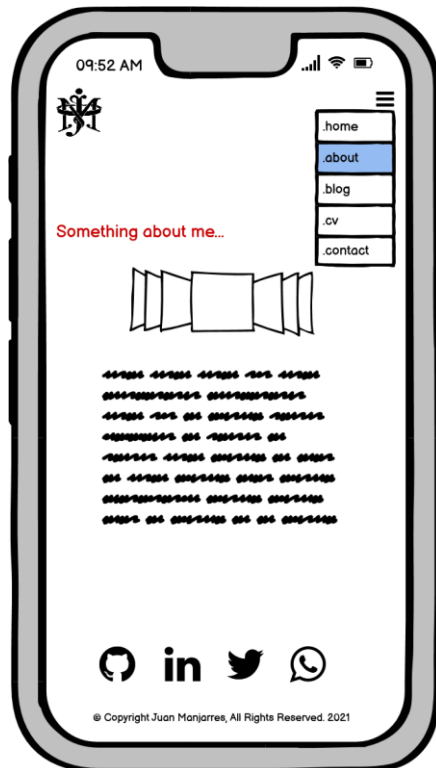

Home/Index

The landing page.

Contains greeting animate label (typing effect), introduction. it has a profile image that is wrapped in text.
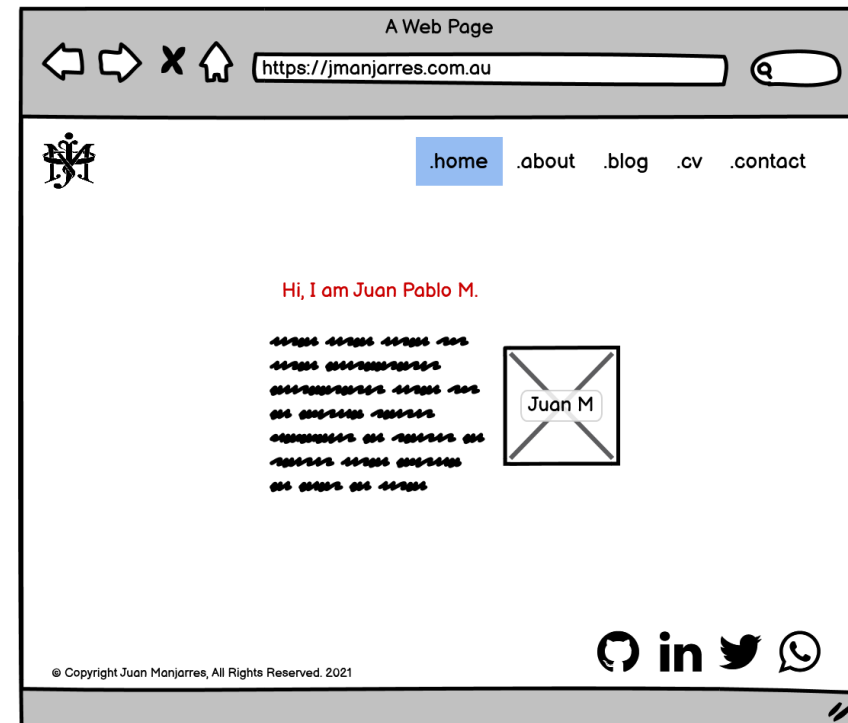

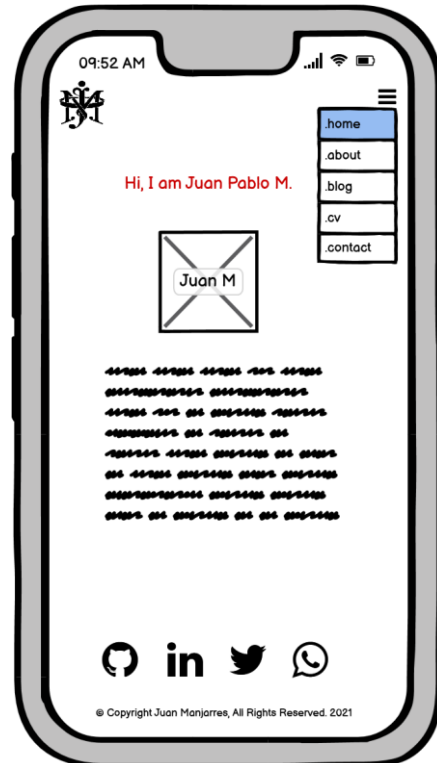

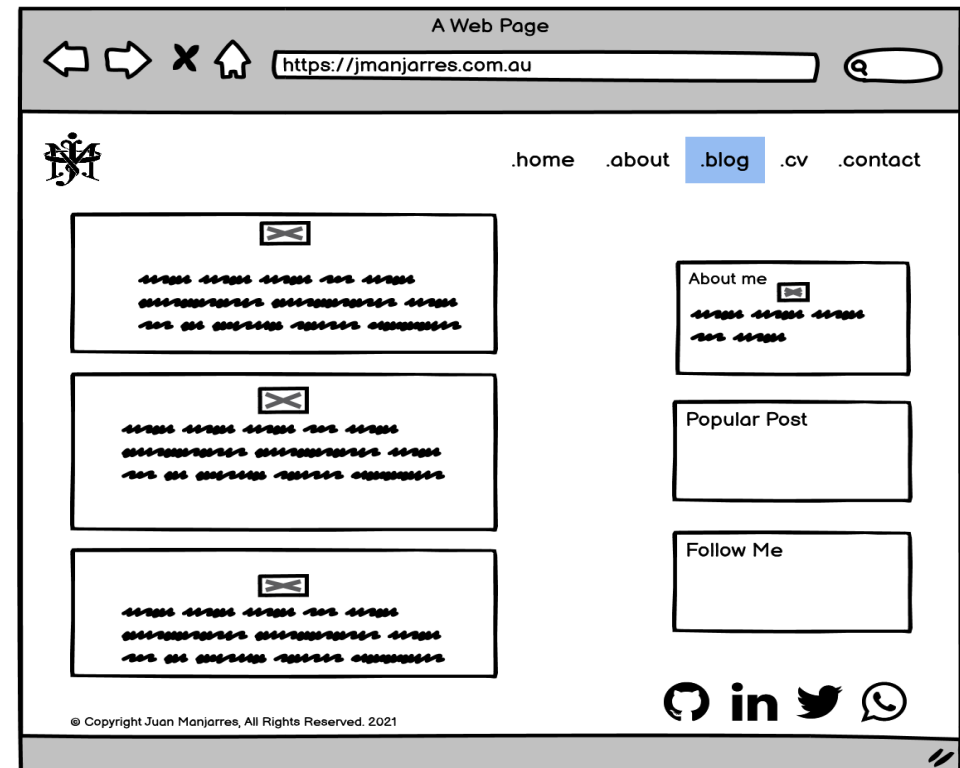

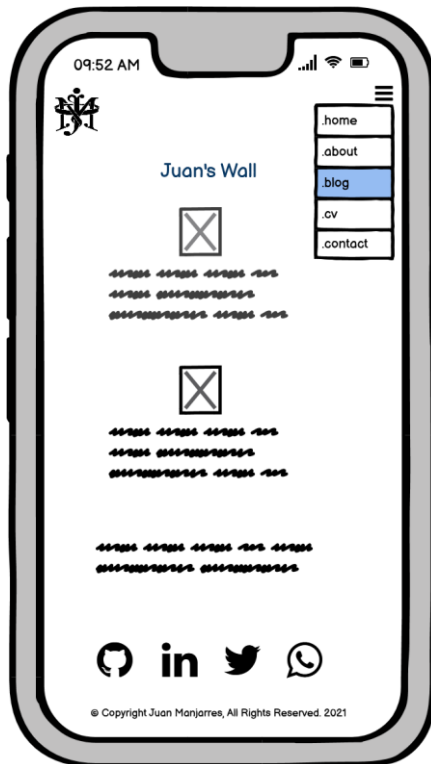

About

the about page consists of an animated photo slide and a paragraph about the author (me) interest and highlights achievements.
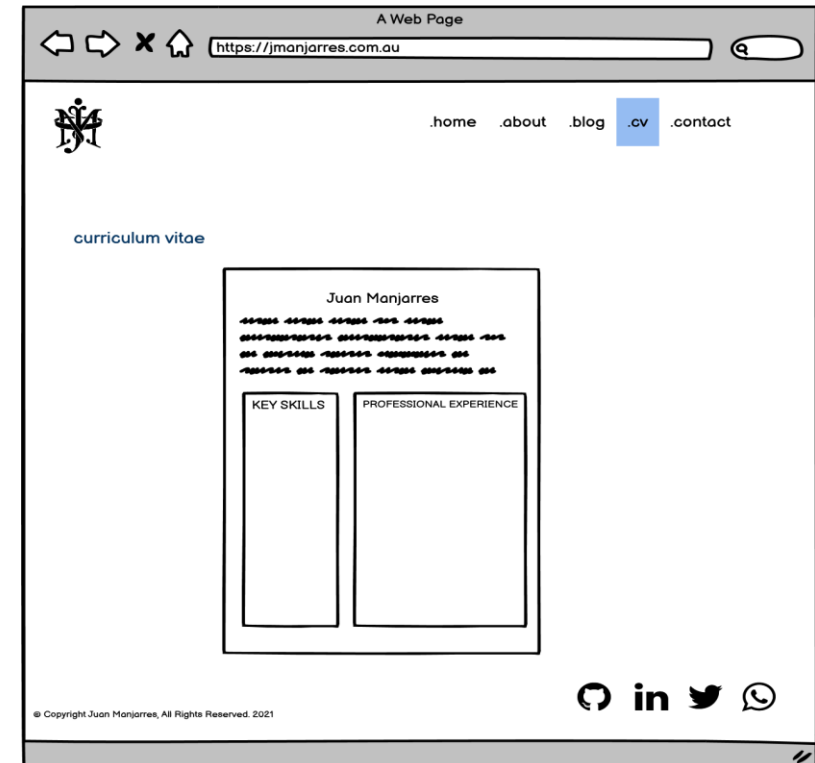

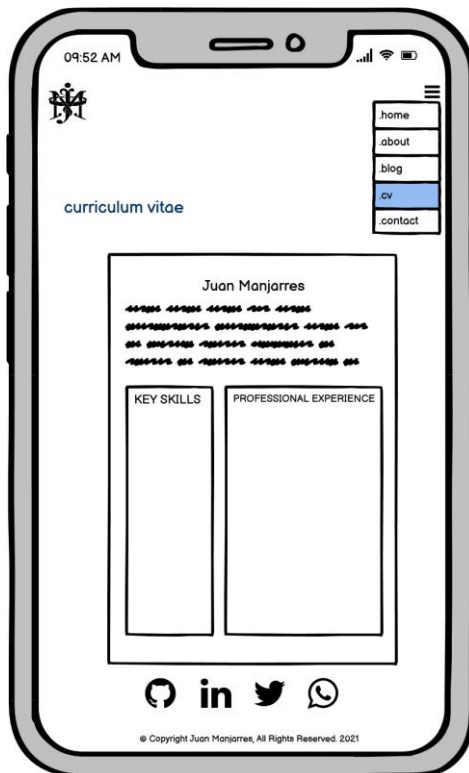

Blog

The blog page consists of a list of my fav blogs (IT related) each one has a picture and a brief description or latest post.

CV

The resume page contains an embed that reads a pdf and allowed the visitor to either print or download the resume.

Contact

the contact page contains a working contact form that has been linked to a php file that allowed it to send, the form also has validation which disallows a user to submit a form with empty text fields and displays error/helper messages below the input fields.
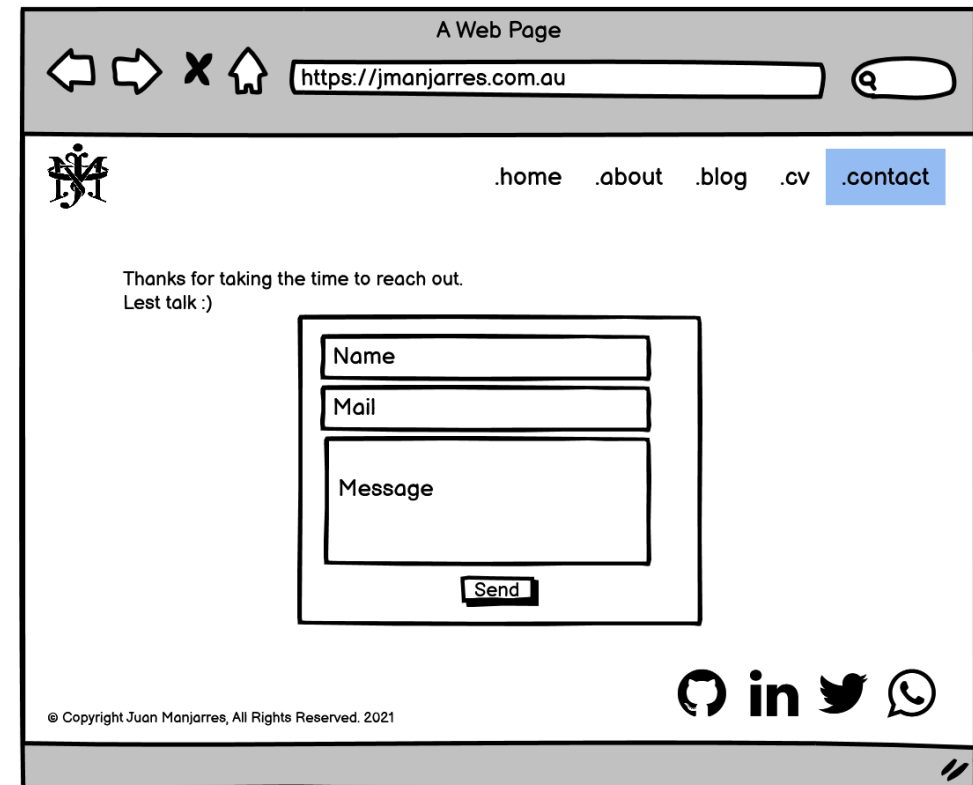

The result

Home Page

Content:

Header that contains Logo and Menu. The logo has a rotating animation. All the elements in the header have position flex and are aligned horizontally.

Main section:
Header Label, Image. 2 different animations, one has a typing effect, and the second one has a scroll-up effect.

Footer:
Social Media Icons with a glowing effect when hover over it and links to my socials
Copy right label.

The result

Blog

Content:

Header that contains Logo and Menu. The logo has an animation using …. All the elements in the header have position flex and are aligned horizontally.
